Question #07

The image shows a Kali Linux virtual machine running on Oracle VM VirtualBox. The browser window displays the bwAPP (Buggy Web Application) homepage, which is an extremely buggy web app. The page has a yellow header with the bwAPP logo and a navigation bar. The main content area features a list of bugs and a section for choosing a bug to test. The network inspector is open, showing a list of requests. The first request is a GET request to http://127.0.0.1:8080/portal.php, which is cached. The response headers are visible, showing a 200 OK status and various headers including Content-Type, Content-Length, and Server.

bwAPP - Portal
an extremely buggy web app!
